

Simple IP Subnetting Review and Practice

Workshop

Format: Workshop Recording **Audience:** Technicians, System Administrators, System Planners and Designers, Tech Support **Duration:** 1 hr

Overview

This is a short review of how IP addresses work and how to discover the basic details of any network. It is for anyone who is curious to know more about IP addressing and why they need a subnet mask.

Prerequisites

None.

Topics

We start with a basic review of addresses, masks and subnets.

We move on to a very simple and fast method for finding out how big a particular subnetwork is, even if all you know is your own computer's address and mask. This method is a snap to use in the field if you are troubleshooting phones on a customer's undocumented network and is essential for solving subnetting problems on exams!

The attendee leaves with a simple subnetting worksheet that generates unlimited subnetting practice problems with worked-out answers.

Additional Recommended Training

None.
