Mitel®

Clustering and Resiliency

on the MiVoice Business (MCD) Workshop

Format: Workshop Recording **Audience:** Technicians and Users **Duration:** 1 hr

Overview

This workshop introduces the users to the programming steps involved with how to migrate to a Common Data Distribution, or Global Data Model (GDM) environment from an existing Ops Manager environment, and how to program a new GDM environment from a non-synchronizing network.

Prerequisites

None

Topics

We discuss programming steps and best practices to provide clustering and resiliency to a networked environment using MCD 4.0 for the 3300 ICP.

Additional Recommended Training

None
